## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3 November 2009 has been entered.

### ***Allowable Subject Matter***

**Claims 1-19** are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's **claim 1** is drawn toward a method for managing the recording capacity of a recording device when scheduling the recording of an item, comprising: receiving data representing a plurality of recording modes of the recording device; for each recording mode of the plurality of recording modes, calculating a capacity required to record said item using the respective recording mode; obtaining a prevailing unreserved recording capacity of the recording device; identifying, for the recording of said item, a number of recording modes of the plurality for which a corresponding calculated capacity is less than the prevailing unreserved recording capacity; and responsive to one or more recording modes of the plurality being identified for the recording of said item, selecting a particular identified recording mode of the one or more identified recording modes based on a preference, wherein the preference

Art Unit: 2621

includes criteria that define a set of acceptable recording modes associated with said item; and responsive to the particular identified recording mode being selected, scheduling the recording of said item using the selected recording mode, wherein the scheduled recording of said item becomes a reserved item, and wherein the receiving, obtaining, identifying, selecting, and scheduling are independent of user involvement.

Applicant's independent **claim 1** comprises a particular combination that is neither taught nor suggested by the prior art. The closest prior art of record, Gunji et al (US Patent 7,212,725), differs from the claimed invention by not teaching or fairly suggesting wherein the scheduled recording of said item becomes a reserved item, and wherein the receiving, obtaining, identifying, selecting, and scheduling are independent of user involvement. Rather, Gunji discloses a picture recording reservation method that requires user interaction in the form of a user making mode selection and pressing a recording reservation key on a remote control (see, e.g., column 9, lines 3-5; column 10, lines 6-7 and lines 56-57).

The Examiner notes that Applicant's independent **claims 3 and 13** contain similar limitations ("...independent of user involvement") as claim 1 above, and are therefore found to be allowable for similar reasoning.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
